GI Histology

NAME	VALUE
F	A:Stomach, Antrum:Biopsy
Diagnosis Summary :Gastric mucosa with no significant histopathologic abnormality No H. pylori on immunostain No intestinal metaplasia (ABPAS stain)	
F	B:Stomach, Body:Biopsy
Diagnosis Summary :Gastric mucosa with no significant histopathologic abnormality No H. pylori on immunostain No intestinal metaplasia (ABPAS stain)	
F	C:Stomach, Fundus:Biopsy
Diagnosis Summary :Gastric mucosa with mild chronic inactive inflammation. No H. Pylori on immunostain. No intestinal metaplasia (ABPAS stain).	
F	D:Esophagus, Distal:Biopsy
Diagnosis Summary :Squamous mucosa showing many intraepithelial eosinophils (>30/HPF) with superficial concentration of eosinophils and reactive changes – consistent with Eosinophilic Esophagitis, or moderate reflux esophagitis, in the appropriate clinical and endoscopic setting. No intestinal metaplasia or fungi (ABPAS stain).	
F	E:Esophagus, Mid:Biopsy
Diagnosis Summary :Squamous mucosa showing many intraepithelial eosinophils (>30/HPF) with superficial concentration of eosinophils and reactive changes – consistent with Eosinophilic Esophagitis in the appropriate clinical and endoscopic setting. No intestinal metaplasia or fungi (ABPAS stain).	
Site ID:A Gross Description:Received in formalin are 2 fragments of tan soft tissue labeled "Stomach, Antrum," measuring 4 x 3 x 1 and 2 x 1 x 1 mm. The specimens are submitted entirely in a single cassette.	
Site ID:B Gross Description:Received in formalin are 2 fragments of tan soft tissue labeled "Stomach, Body," measuring 3 x 1 x 1 and 2 x 1 x 1 mm. The specimens are submitted entirely in a single cassette.	
Site ID:C Gross Description:Received in formalin are 2 fragments of tan soft tissue labeled "Stomach, Fundus," measuring 3 x 3 x 1 and 1 x 1 x 1 mm. The specimens are submitted entirely in a single cassette.	
Site ID:D Gross Description:Received in formalin are multiple irregular fragments of tan soft tissue labeled "Esophagus, Distal," with an aggregate measurement of 4 x 4 x 1 mm. The specimen is entirely submitted in a single cassette.	
Site ID:E Gross Description:Received in formalin are multiple irregular fragments of tan soft tissue labeled "Esophagus, Mid," with an aggregate measurement of 4 x 4 x 1 mm. The specimen is entirely submitted in a single cassette.	

NAME	VALUE
Clinical History:	Patient History Of: Other-- Exclusion of eosinophilic esophagitis, - Heartburn;
Rule Outs:	A) Rule out H. pylori, B) Rule out H. pylori, C) Rule out H. pylori, D) Rule out eosinophilic esophagitis, E) Rule out eosinophilic esophagitis
Electronically signed by : Dr.Natalie Poppito on :04/11/2025 02:31:18 PM
