ULTRASOUND WHOLE ABDOMEN

Ultrasound was done using a curvilinear probe with special 2D enhancement features including compound and speckle reduction imaging (SRI).

Clinical profile: Routine check-up.

Liver: is normal in size and measures 13.7 cm craniocaudally. It shows mild diffuse increase in the parenchymal echogenicity suggestive of grade-I fatty changes. No evidence of any focal parenchymal lesion is seen. Intrahepatic biliary radicals are normal in course and calibre. Portal and hepatic veins are normal in course and calibre. Portal vein at porta measures 9.9 mm.

Gall bladder: is well distended with normal wall thickness. Few mobile hyperechoic foci are seen in gall bladder lumen casting posterior acoustic shadowing measuring approximately 3.1 mm, 3.8 mm and 3.1 mm suggestive of cholelithiasis. Mild amount of echogenic biliary sludge is also seen in the lumen. No pericholecystic fluid seen. CBD is normal in calibre and measures 3.9mm.

Pancreas: is normal in size and echotexture. No focal lesion is seen. The pancreatic duct is not dilated.

Spleen: is normal in size (9.5cm) and echotexture. No focal lesion is seen.

Both kidneys: are normal in size, shape, position and echotexture. Corticomedullary differentiation is maintained bilaterally. No evidence of any calculus or hydronephrosis is noted on either side.
Right kidney measures 9.8 x 4.5 cm. Cortical thickness measures 1.8 cm.
Left kidney measures 10.5 x 4.9 cm. Cortical thickness measures 1.8 cm.

Urinary Bladder: is normally distended. The bladder wall thickness is normal. No calculus is seen. Pre-void bladder volume measures 515.7 cc. Post-void residual urine measures 16.9 cc (insignificant).

Prostate: is normal in size, and shows homogenous echopattern. It approximately measures 3.9 x 2.6 x 2.5 cm (volume: 14.0cc).

No free fluid / significant lymphadenopathy is seen in abdomen or pelvis.

OPINION: Ultrasound findings are suggestive of

- Fatty infiltration of liver grade I.
- Cholelithiasis with gall bladder sludge.

Please correlate clinically.
